- Tools: **Git, Firebase, VS Code, Vercel**
- Core Skills: **Responsive Design, API Integration, SEO Optimization, UI Performance Tuning**

EDUCATION

Bells University of Technology
Ogun Expected in 07/2027
B Sc - Computer Science

- Relevant Coursework: Data Structures, Digital Logic Design, Discrete Mathematics
- (Current GPA: 4.59)

PROFESSIONAL SUMMARY

Frontend developer with 3 years of experience building scalable, responsive, and SEO-optimized apps using Next.js, TypeScript, and Tailwind CSS. Proven track record of shipping pixel-accurate interfaces from Figma and integrating Firebase for real-time data flows. Fast learner, clean coder, and collaborator—built multiple live apps currently serving 100+ users monthly.

WORK EXPERIENCE

Inventors Community

01/2025 - PRESENT

Front End Developer

- Built 10+ responsive web pages with Next.js and Tailwind, reducing bounce rate by 25%.
- Translated over 15 Figma designs into reusable components with pixel-accuracy.
- Integrated Firebase Auth & Firestore for real-time user data sync across sessions.
- Contributed to Git-based team workflows and performed regular code reviews.

PROJECTS

Bloom & Root - Plant Shop Website

Live Demo

Tech Stack: Next.js, TypeScript, Tailwind, Firebase.

Deployment: GitHub Pages, Vercel

Key Features & Achievements:

Designed and developed a **plant-shop website** with features including:

- Designed and launched a mobile-first e-commerce site for plant sales.
- Created a contact form with live email sync using Firebase Functions.
- Deployed to Vercel with SEO and performance optimization (~95 Lighthouse score).

Netflix-Inspired Website - Movie Website

Live Demo

Tech Stack: Next.js, TypeScript, Tailwind, Firebase

Deployment: GitHub Pages, Vercel

Key Features & Achievements:

- Built a full-featured movie browser with TMDB API integration and user authentication.
- Implemented dynamic routing and saved user preferences using Firestore.
- Integrated CSS transitions and React animations for smooth UX.
